PROFILE

Enthusiastic Front-End Developer eager to launch a career in web development. Proficient in HTML, CSS, JavaScript, and React.js, with a strong foundation acquired through self-study and practical projects. Skilled in building responsive and intuitive user interfaces, enhancing the user experience. Committed to continuous learning and staying updated with the latest trends and techniques in web development, including React ecosystem advancements. A collaborative team member with good communication skills, ready to contribute to the success of innovative projects in a dynamic work environment.

PROJECTS

Pets & pets product website using HTML & CSS

- It is an e-commerce website developed using HTML and plain (vanilla) CSS
- Through this project, I enhanced my understanding of CSS for styling the website and gained a deeper understanding of Flexbox, learning to create a fully responsive website.

CRUD opertation using Javascript

- I developed a JavaScript CRUD operations project, enabling users to create, read, update, and delete data efficiently.
- This project helped me gain a lot more knowledge and understanding of JavaScript, especially event handlers and DOM manipulation

My Portfolio website

- My portfolio website represents who I am and showcases all of my projects.
- By developing my portfolio website, I learned to implement functionality and different types of animation.
- This project was instrumental in honing my web development skills and expressing my creativity

Chat-APP using React

- I developed a simple Chat app or Chat Web app using React. By working on this project, I gained a deeper understanding of array concepts in React, especially the Map method.
- Additionally, I furthered my comprehension of event handlers in React, enhancing my overall proficiency in web development

Watch E-commerce website using React

- I developed a watch e-commerce website using React. By building this website, I gained a deeper understanding of React Routers.
- Additionally, I enhanced my comprehension of Props, useEffect, and State in React. I also learned how to implement conditional rendering in React, further expanding my knowledge of front-end development
